

**H** Hybrid

THC: 26% - 27%

50% Sativa /50% Indica

5 Alive, also known as "Five Alive," is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the potent Bubblegum X Orange Juice X Grape Pie strains. The perfect hybrid to help you kick back and relax on a lazy evening or weekend day, 5 Alive packs a soothing high that will leave you feeling stoned and out of touch for hours on end. The high settles in a few minutes after your final exhale, filling you with a lifted sense of happiness that pushes out any negative or racing thoughts. At the same time, a tingly physical sense will wash over your body, dropping you into a state of pure relaxation that has you feeling out of touch and super stoney. This combination will have you feeling giggly at times, falling in and out of fits of laughter before you even realize what's happening. Combined with its high 26-27% average THC level, these effects make 5 Alive a great choice for treating conditions such as chronic stress or anxiety, PTSD, depression and mood swings. This bud has a sweet and sour citrusy lemon flavor with hints of fresh and fruity berry upon exhale. The aroma is of sour citrus, fresh fruity berries and earthy herbs. 5 Alive buds have fat and small rounded emerald-green nugs with dark purple leaves, golden undertones, long thin red-orange hairs and a coating of chunky, golden-white crystal trichomes.
